

TIGER VALLEY

TACTICAL INSTITUTE FOR GUN EDUCATION AND RESEARCH

Tiger Valley Law Enforcement Rifle Video

Tiger Valley conducts a wide range of training programs for the law enforcement community. This video showcases our precision rifle training with facilities that include a wide range of target and training systems. Our 1000 yard range with pit service allows a variety of realistic moving target situations to be created.

Elm Fork Tuesday Night Classes

Past Events

Tiger Valley ran two Tuesday night classes in August. Our "CHL Skills & Tactics" class prepared students for drawing and utilizing their daily carry firearms in realistic situations.

The second class was "Women's Pistol Overview". We had an outstanding group of students, many with very little firearms exposure, who developed a solid foundation with the use of a pistol. Thanks to all who attended these events!

High Threat Environment Carbine

On September 8th learn how to engage moving targets and overcome dynamic and high threat situations with your carbine. Our motorized target system will be utilized for this class.

This is not an entry level class and the basics of carbine operation will not be covered, only more advanced topics.

The cost is \$65 and pre-registration is not required. The course is at [Elm Fork](#) and runs from 6:30 PM to 9 PM. Bring your carbine with sling, safety gear, and 250 rounds of ammunition. Conversion kits for .22 LR are allowed and we have a number of kits available as a free loaner if you call in advance.

Shooting from Cover - Pistol

On September 22nd develop effective skills in out of position

shooting with a handgun. Our multiple position barricades will be utilized for the class, as shown in the image on the right. Targets will be covered in shirts to present more realistic shooting situations.

The cost is \$65 and pre-registration is not required. The course is at [Elm Fork](#) and runs from 6:30 PM to 9 PM. Bring your pistol, holster, safety gear, and 250 rounds of ammunition.

Armorer Class Wrapup and Report

--by T.J. Pilling

Tiger Valley held its first AR-15 Armorer Course, taught by David Gregor and Jerry Simmons from Advanced GunWorks of Roanoke, Texas. This was a great class for me. With being handed by first M-16 over 28 years ago, it was great to finally take a formal class and confirm some things that you have been doing.

Unfortunately I am self-taught on this weapon system, a parts monkey that changed things that didn't seem to be working. Through trial and error I would hit it right most of the time, the other times meant swapping parts and hoping for the best. I had the advantage of working on the department's guns and having tons of spare parts. Unlike myself, David with Advanced GunWorks has a long pedigree when it come to working on weapon systems. He has had the opportunity to work for numerous Federal and Military Units, including the FBI's Hostage Rescue Team and Navy SEAL Team Six. His experience has allowed him access to inside information not readily available to the average instructor.

The class started at 8:00 am and was held at the Garland Police Department multimedia conference room; yes it was nice with lots of AC and great video equipment. For an extra \$110.00 a tool kit and spare parts kit was included in the class. For those without extensive tools this came in handy. A total of ten students opted for the tool kit, which had just about everything you need to get yourself in trouble without formal instruction.

On day one we started the class with the basics of how the weapon system is made. Advanced GunWorks had some great forgings in different states of completion. We went into detail on barrel manufacturing processes, bolts, barrel extensions and internal parts. The weapons were broken down into their components and examine in detail. Trigger

groups were discussed as well as how they functioned.

We looked at detail between the differences between AR-15 parts and M-16. I was set back when I saw the difference between firing pins, which I didn't know existed as well as feed ramps in the M4 variants and other AR-15's.

The class did lots of weapons disassembly, with the help of Jerry and Dave when things got rough in reassembly. The class had a wide range of experience, some having spent years working on weapons and some were raw recruits at it.

Day two started with some great interactive video on the function cycle of the AR-15 and M-16, for those who didn't have a grasp of this concept, the video clear thing up. The video allowed the instructor to zoom into area that were of interest and slow the action down. We had a long question and answer session where students were allowed to ask pertinent question about problems that they had experienced.

Advanced GunWorks showed up with a coffin sized toolbox with everything and anything you would need or want including spare parts and select parts that were for sale. Several in the class opted for ambi-magazine releases and other components as long as they were tearing the weapons down. At the conclusion of the class everyone received a certificate from the Garland Police department for the 16 hours of training. For me the class was fast paced and informative. If you guys need firearms work done you need to give the guys at Advanced GunWorks a look, whether it is to have a part installed or have a complete custom rifle built. They have customer service that can't be beat.

The class sold out and we have a waiting list for the next class. Give us a call or send an email if you'd like to have a spot in the next AR-15 Armorer Course we offer.

September Team Sniper Match Sponsors

Tiger Valley has an ourstanding group of sponsors who are

supporting the shooting sports by donating excellent gear to the prize table of our Team Snper Match on September 19 and 20.
